

# mFluor™ UV375 Anti-human/ non-human primates CD184 Antibody \*12G5\*

Catalog number: 118400X0, 118400X1

Unit size: 100 tests, 500 tests

#### **Product Details**

Storage Conditions 2-8°C with minimized light exposure. Do not freeze.

Expiration Date 12 months upon receiving

Concentration 0.1 mg/mL

Formulation Phosphate-buffered saline (PBS, pH 7.2), 0.09% sodium azide, 0.2% (w/v) BSA

### **Antibody Properties**

Species Reactivity Human, non-human primates

Class Primary

Clonality Monoclonal

Host Mouse

Isotype Mouse IgG2a kappa

Immunogen CD184 (CXCR4, Fusin)

Clone 12G5

Conjugate mFluor™ UV375

### **Biological Properties**

Appearance Yellow liquid

Preparation Antibody purified by affinity chromatography and then conjugated with mFluor™ UV375 under

optimal conditions

Application Flow Cytometry (FACS), Fluorescence Imaging

#### **Spectral Properties**

Conjugate mFluor™ UV375

Excitation Wavelength 351 nm

Emission Wavelength 387 nm

## **Applications**

The 12G5 monoclonal antibody recognizes human/ non-human primates CD184, a 45 kD member of the Rhodopsin family commonly found on the surface of T cells, endothelial cells, hematopoietic progenitors, granulocytes and Tregs. CD184 is associated with a variety of biologically interesting macromolecules/ligands, for example, CXCL12, viral MIP-2 and SDF-1. CD184 is a relatively rare antibody target, with fewer than

| 1000 publications in the last decade. Even still, CD184 is frequently used in flow cytometry applications as a phenotypic marker for differentiation of cell types, particularly in the study of cell biology, neuroscience and neuroinflammation. This antibody was purified through affinity chromatography and conjugated to mFluor™ UV375 (ex/em = 351/387 nm). It is compatible with the 355 nm laser and 379/28 nm bandpass filter (for example, as in the BD LSRFortessa™ X-20). |
|---|
| bandpass litter (for example, as in the bb LSM oftessa - X-20).   |
